MARITIME MANAGEMENT

Ship:
MV Nordica

Client and owner:
Dublin Bulk Limited

Ship Type:
General Bulk

Job Category:
Consultancy and Management

Maritime Management is a one stop shop for the shipping investor. A number of ships were inspected prior to the purchase of MV Nordica and our recommendations were submitted to the owner on which they used to acquire the ship.

When the ship was bought, **Maritime Management** executed a sales docking and ensured immediate commencement of time charter hire.

Maritime Management assisted the owner in the arrangement of the time charterer in advance of purchase as well as checking the sales documents for the ship.

Maritime Management provided a full crew complement ready for the manning of ship.

In March 2011, the ship and company was accredited to the ISM code & ISO 9001 and ISO 14001; the quality and green standards with no observations or non-conformities, a perfect score!

Now, as one of the few ships sailing in the world with ISO 9001 and ISO 14001, MV Nordica offers a considerable competitive advantage when presenting her ISO certificates and hence, *proof of excellence*, to the likes of Charterers, Ports Authorities and Port State Control.

Maritime Management understands ship operations and maintenance. Our diligent and knowledgeable management offers a maintenance and operational budget at the beginning of the year which we stick to. Having full account of each cost element, we analyse our performance and offer our client monthly or quarterly reports.
