# Services to the Fishing Industry

## Surveys – Maritime Management

- Advise on the condition of the vessel's structure, equipment and technical specification of the vessel and issue a comprehensive preliminary report and valuation for the buyer to use in negotiation with the seller. A separate report can be issued to outline the regulatory requirements. At any time a survey can be carried out to ascertain the general condition of a vessel.
- Survey reports can be issued for insurance, bank, sea fisheries and licensing requirements.
- We can also assist in dealing with flag authorities and attend MSO surveys if required.
- Report and advise on the completeness and validity of technical and statutory documentation.

## Consultancy – Maritime Management

- Report and advise on the completeness and validity of technical and statutory documentation.
- Design and prepare drawings for hull modifications.
- Review existing Stability books and assess new structure or loading conditions.
- Prepare drafts and guides for skippers / owners on specific applications of your vessel.
- Put together complete safety folders and guides to owners / skippers for its use and ongoing maintenance.
- Advise on vessel preparation for survey approval by the Marine Survey Office.

## Project Management – Maritime Management will:

- Plan, prepare the specification and price with different boat yards.
- Manage all works up to delivery. From concept to financial and building supervision and completion. We can provide all you require to develop a successful project.
- Undertake full technical management of the vessel on your behalf.
