

**The Professional  
Marine Service  
Provider**

## **MARITIME MANAGEMENT**

**Maritime Management** is your reliable international service partner which provides worldwide indepth expertise in shipping, maritime operations and technology and transport economics.

Our management systems are accredited to the highest international quality and environmental standards; ISO 9001 and ISO 14001.

Our team of experienced Naval Architects, Deck and Engine Ship Officers, Marine Surveyors and Business Consultants are readily at hand to provide expert assistance.

Projects demanding multi-trade skills are performed by bundling the firm's technical, operational and financial expertise.

With certified accountants and business analysts, we provide accurate accounts of ship operations, project budgets, expenditures, cost benefit analyses and feasibility studies.

We have insurance cover for all our business lines.

# The Professional Marine Service Provider

**Maritime Management** offers you the following:

- Ship management
- Crew management
- Conversion and drydocking
- New building supervision
- Operational engineering
- Naval architecture & stability analysis
- Conceptual design and implementation
- Investigation and third party verification
- Loss and risk analyses of marine operations
- Asset valuation, condition survey
- Damage and claim survey
- Cargo and loading survey
- Expert witness
- Ship sale and purchase, initial inspection to full management

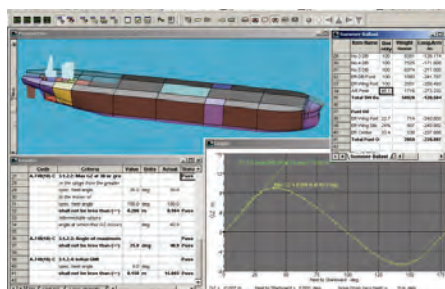

We have experience built up from a number of ship conversions which include the following ship types amongst others:

- Anchor Handling to Seismic Support Vessels
- Liner Service Ships to Arctic Cruise Vessels
- Ice Breakers to Research Ships

As ship managers of cargo, reefer, research and passenger ships, we have managed numerous drydockings and have a team of dedicated experienced engineers and master mariners who understand that shipping is a 24/7 business.

We have our own agreement with crewing agencies in Russia, Ukraine, the Philippines and the Baltic states.

Employing Naval Architects equipped with the latest stability software, we are able to execute in-house stability analyses providing cost efficient and accurate calculations to support our projects.

For the insurance & legal sector we have been involved in a number of assignments of varied nature. We have attended to assess cargo container damage incidents. We have investigated and assessed structural damage to ships after collisions and have been engaged as expert witness on several occasions.
