

Mega Yacht & Passenger Ships Projects and Management

MARITIME MANAGEMENT

Maritime Management is a reliable international service partner which provides worldwide indepth expertise in shipping, maritime operations and technology; and transport economics.

Our management systems are accredited to the highest international quality and environmental standards; ISO 9001 and ISO 14001.

Our team of experienced Naval Architects, Deck and Engine Ship Officers, Marine Surveyors and business consultants are readily at hand to provide expert assistance.

Our project management strength has been our flexibility to adapt to the demands of challenging projects where bespoke services have been required.

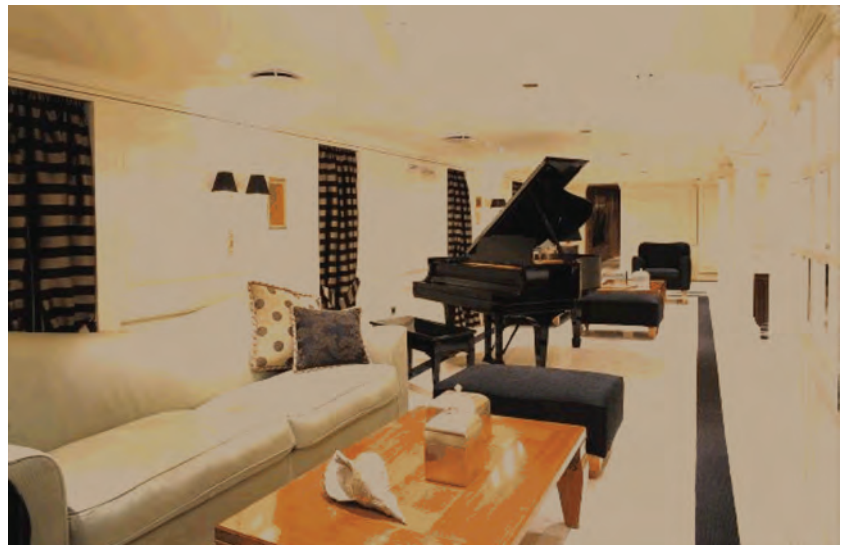

With certified accountants and business analysts, we provide accurate accounts of ship operations, project budgets, expenditures, cost benefit analyses and feasibility studies.

Employing Naval Architects equipped with the latest stability software, we are able to execute in-house stability analyses providing cost efficient and accurate calculations to support our projects.

We have insurance cover for all of our business lines.

Mega Yacht & Passenger Ships Projects and Management

Maritime Management's team are accustomed to dealing with complex client relationships, shipyards, multiple suppliers and contractors. Our focus is always on delivery. We are proactive in forcing the progress of a project by identifying the key management difficulties and where necessary filling in the gaps ourselves. This enables quality delivery which importantly, is in accordance with the owner's specific requirements of quality and style.

Our recent combined experience in relation to the mega yacht business include:

- Management of passenger vessels & mega yachts.
- Supervisor on M/Y Christina's Major 2001 conversion.
- The MV Sakhalin conversion to Diesel Electric Propulsion with 15,600hp.
- National Geographic Explorer, conversion to an Arctic cruise vessel.
- In Holland, the construction and out fitting of an offshore accommodation block for 375 persons.
- In Shanghai, the conversion of a RoRo passenger vessel with capacity of 1100 men, doubling the vessels capacity.
- The design and new building management of a cargo and hydrographic vessel.
- Conversion of 3 Anchor Handling Vessels to Seismic Support Vessels with an increase in passengers and capacity.
- Two major multi-million euro upgrades of RV Nautilus at yards in Turkey and the management of successful research seasons with both National Geographic and ABC News onboard.
- The design of the Liffey Floating Hotel – a floating 5 star hotel in Dublin city centre.
