

MARITIME MANAGEMENT

Maritime Management's experienced team of naval architects offer the following naval architectural services for a particular vessel.

Design

- Detailed Weight Estimations
- Detailed Structural Design
- Drawings for Class and Flag e.g. structural drawings after major modifications etc...
- Intact and Damage Stability Analysis

Inclining Experiments

- Execution of inclining tests on all types of vessels including fishing vessels with Class or Flag present.

Documentation

- Fire & Safety Plans
- Stability Booklets

With in-house A0 colour printing facilities, drawing can be printed immediately allowing for swift deliveries.

Summary

- With state of the art computer software, we can create 3D models of your vessel with our Maxsurf program and run detailed stability analysis with our Hydromax software.
- Should a vessel have no existing plans, we can measure a vessel's hull and create new plans which will be adequate for running a stability analysis on the vessel.
- With the use of AutoCAD, we can create detailed drawings as required by class and create fire & safety plans.
